Improvised Explosive Device (C-IED) awareness courses provide basic bombing prevention information ranging from IED construction and classification to the terrorist attack cycle. All on-line virtual training courses are conducted with a live instructor, using the Homeland Security Information Network (HSIN) Connect feature. Participants can connect either as a HSIN member or guest (does not require a HSIN membership). VILTs are great for participants with time availability constraints as most classes are approximately one-hour in length and can be taken independently.

Additional information: Classes are open to anyone. A FEMA Student Identification (SID) number and Password are required to apply. If you don't have a FEMA SID one can be obtained by going to: <https://cdp.dhs.gov/femasid/register>.

Registration Information: For more information and to access the online registration process, visit the **OBP VILT Schedule/Registration Page** at: <https://cdp.dhs.gov/obp>. Select the desired course and date from the listings and you will be automatically directed to the online application process. Registration must be completed two business days prior to class start date. The June schedule is included below:
